

Congratulatory Message on the 50th Anniversary of the Faculty of Science

On the auspicious occasion of the Golden Jubilee of the Faculty of Science, I would like to convey my heartfelt congratulations to the faculty and staff, students and alumni of the Faculty for their achievements and those of their forerunners in the past five decades.

Ever since its founding in 1961, the Faculty has been evolving with the times with foresight, innovation and dedication. It has been diligently providing quality science education and fervently conducting cutting-edge research which underpins its academic programmes and benefits society. The vibrant and committed faculty cherish the fine tradition of giving their best to the nurturing of students and the pursuit of knowledge through research. More recently, the Faculty has been stepping up its efforts to contribute to a better understanding of the role of science and technology in the modern world, to find solutions to the environmental problems facing humankind, and to support sustainable development.

The remarkable accomplishments of the Faculty of Science are the result of the staunch support of the University as well as the concerted efforts and strong commitment of its faculty and staff, students and alumni. The Golden Jubilee presents a golden opportunity for the Faculty to celebrate its successes, reflect on its past and look into the future.

May I wish members of the Faculty of Science the wisdom, courage and perseverance to forge ahead in their academic pursuits and scale new heights in the realm of science!

Wilfred Y.W. Wong, SBS, JP
Council and Court Chairman
